EMPLOYMENT HISTORY

✳ Software Developer (Frontend), Digifigs.com   November 2020 — Present
                                                                                                                   Ibadan, Oyo

- Working with the tech team at Digifigs, updated the website utilizing React, Animation, color gradients, and a variety of other visual elements to make it more attractive, hence engaging more users and boosting the chances of gaining new clients by 20% (https://digifigs.com).
- Collaborated with UI/UX Designer to create an in-house React dashboard for BFCC that allows users to track and publish questions, keep track of students' grades, and categorize them based on their age and courses taken. The requirement to manually upload questions, set tests, grade and score tests was eliminated (https://test.bfccentre.com).
- Swift-branding website built with React, CSS modules, React-router, and classical components (Swiftbranding.ng).

✳ Side Projects   March 2020 — Present

- Natours website with amazing 3D animation, responsive visuals, and cross-browser compatibility utilizing HTML and SASS (https://natours1.vercel.app).
- Burger-builder application built with React library, React-router, CSS Modules, Redux, React-router, and React Hooks. Signup and authentication were implemented using firebase (https://burger-purchase.herokuapp.com).
- Resume-builder (https://resume-builder1.vercel.app): an online application for building customized resumes utilizing React Hooks, tailwindcss and styled-components for styling, and react-pdf to generate pdf documents.
- Millenniapets: a website for the acquisition and sale of pet dogs. A single-page app created with React for the front-end and Firebase for the back-end, in conjunction with the Whatsapp API so that users may contact the dealer via Whatsapp on their phones, and DNS protection supplied by Cloudflare (https://millenniapets.vercel.app).
- Taskyfy: a to-do app with drag-and-drop functionality built with React and TypeScript (https://d-n-d-react-typescript.vercel.app).

CORE FRAMEWORKS

ReactJs	*Expert*	Redux	*Proficient*

DATABASE AND QUERY TOOLS

Firebase	*Proficient*	SQL	*Proficient*

DEPLOYMENT TOOLS AND ENVIRONMENT

Github Actions	*Proficient*	Heroku	*Proficient*

CSS FRAMEWORKS AND TOOLS

TailwindCSS	*Expert*	Material UI	*Proficient*
SASS/SCSS	*Expert*	Styled Components	*Proficient*

SOFT SKILLS

- Knowledgeable in Continuous Integration and Continuous Deployment (CI/CD).
- Knowledge of Data Structure and Algorithms.
- Creative and analytical thinking.
- Experienced in remote working and collaboration.
- Knowledgeable in design and implementation of Event-Driven Systems.
- In-depth knowledge of Scrum and agile software development.
- Ability to drive a project from whiteboard to production.
